Education

2022

MSc Artificial Intelligence and Business Analytics

Toulouse Business School | France

9.6/10 GPA

Thesis: "Algorithmic Cryptocurrency Trading using Sentiment Analysis & Dueling Double Deep Q-Networks"

2019

Honours Bachelor of Commerce, Summa Cum Laude

University of Ottawa | Canada

9.4/10 GPA

Expertise

- Experimentation & A/B Testing
- Causal Inference
- Product Growth Modeling
- Custom LLM Harnesses
- MCP Tools & AI Agents
- Big Data Analytics

Experience

- Coinbase

2025 - Present

Senior Data Scientist

 - Led data science for Coinbase Canada and Coinbase Brazil, owning experimentation, machine learning, and analytics for retail product growth across Canada and LATAM.
 - Gave senior country executives the strategy and insights to make informed decisions, ship quickly, and track results with statistical rigor.
 - Measured brand campaigns, referral offers, and volume-based tiered rewards using randomized A/B/n tests, synthetic controls, and matched difference-in-differences.
 - Led data for Canada's derivatives launch, from eligibility sizing and CRM targeting to volume forecasts, building a \$50M+ notional volume market in the first 30 days.
 - Drove retail app growth with device-to-user attribution, Eppo metrics for new-user incentive experiments, and phone-verified-to-first-trade funnel diagnostics.
 - Built the end-to-end data platform for Brazil's new USDC-BRL retail order books from zero: metric definitions, competitor benchmarks, leadership dashboards, and market-maker SLA reporting used to negotiate contracts.
 - Built AI-native tools, workflows, and custom LLM harnesses with MCP tools that let product managers and executives answer their own data questions and act faster.
- Zinnia

2024 - 2025

Senior Data Analyst

 - Owned a commission reconciliation pipeline for insurance carriers covering \$100M+ in annual revenue, end to end, with Python, dbt (SQL), and Airflow.
 - Advised executives on the profitability of home and auto insurance products, using exploratory analysis and A/B experiments to guide decisions.
- Delivery Hero SE

2022 - 2024

Senior Product Analyst

 - Led product analytics for the global pricing data platform at the world's largest food delivery company, embedding data-driven decisions in product squads.
 - Conducted exploratory analysis, A/B/n tests, and multi-armed bandit experiments using Python, BigQuery (SQL), and Airflow to guide feature development.
 - Built causal forest inference models to support pricing and elasticity measurement in emerging geos, determining how best to enter new markets.
 - Improved global delivery-time estimates by 15% with a deployed density-based clustering model that identified problematic overlaps between delivery zones.
- Deloitte Digital

2018 - 2019, 2021 - 2022

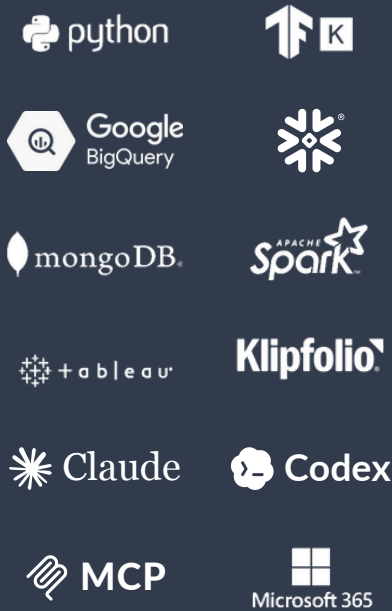

Consultant

 - Led QA and the data analytics stream for a large-scale federal cloud platform used by 400K+ new Canadian migrants each year.
 - Led the analytics team for an NLP-driven fintech market research product, classifying customer data with statistical and unsupervised ML models.

Languages

English
French
Italian
Arabic (Levantine)

Technology

- Canadian Internet Registration Authority 2020
Cybersecurity ML Engineer/Data Scientist
 - Defined the data and machine learning strategy for a new cybersecurity product.
 - Developed cloud-hosted unsupervised learning workflows using ElasticSearch, SQL, and Python to determine new product features based on customer adoption.
- Department of National Defence 2020
Database Administrator
 - Created a data governance model and business strategy for an Azure migration.
- MNP LLP 2019
Analyst/Developer
 - Implemented Azure ML risk analysis, cutting expected controllable costs by 5%.
- Department of National Defence 2016-2018
Records Manager

Certifications

Azure Data Scientist Associate

Certification Number: 993120317

Dell Data Science Associate

Certification Number: OT96TYPRG2E1143C

Leadership & Volunteering

Space Concordia

Project Manager

- Led a team of over 80 student engineers at Concordia University to build and launch a satellite in 2025 as part of the Canadian Space Agency's CUBICS project.

Planetside Open Games

Lead Developer

- Built the only competitive matchmaking and scoring system for Planetside 2, the world's largest MMOFPS, hosting 6,000+ matches on Python, Flask, MongoDB, and AWS.

Jeux Du Commerce

Coach

- Coach for the 2020-2025 JDC teams. Awarded 2022 Coach of the Year.

CASCO Charity Organization

Musical Director

- Planned for and performed in a charity fundraiser, raising \$250,000 over three years for the Children's Hospital of Eastern Ontario, with full-day weekly rehearsals.
